Robert Dunn | The Project PDF File

Create a PDF document that contains:

- A detailed description of where each of the criteria is on your site. Anything not listed here may not be counted.

Jquery effects:

1. *jquery animate:* On the front page there is a features button across the whole screen when clicked the features div will ease away and come back once clicked.
2. *jquery toggle:* From the home screen if you click on gallery button you will see a toggle gallery button which will remove the gallery from the page.

Please include at least 4 of 5 of the following:

3. *An Animated Bar Chart or Interactive Data Visualization:* From the home page go down to the features section and click growth. You will then be taken to the page to show the animated bar chart.
4. *An Interactive Map:* From the home page go down to the features section and click locations. You will then be taken to the map that shows all locations for diggidys.
5. *An Interactive Image Gallery:* From the home page go down to the features section and click gallery. You will then be taken to the image gallery I created.
6. *At least one use of the HTML5 Video and/or Audio tags:* From the home page go down to the content section and go to the right side bar. You will see the video I took for the assignment.
7. *2 Uses of the HTML5 Canvas tag:* NA

- *An overview of why you chose the theme & Idea for your site.*

I was asked to build a site for my bosses new company Diggidy's, I asked if I could use it as a school project and he said yes. I personally designed the whole store right down to the cups. I created all graphics and video. I own the rights to all the material. I themed the site from the way the store looks visually and wanted to give that same kind of feel. Nice spacious.

- *Links to any graphics that you used online with releases that says you can use them*

I created all graphics and video. I own the rights to all the material.
